

The Configuration Workgroup (CWG) is an international user group of SAP customers and partners, focused on the topic of product and solution configuration as implemented in the **Variant Configurator (LO-VC), SAP Variant Configuration and Pricing, SAP Solution Sales Configuration (SSC), S/4HANA Advanced Variant Configuration (AVC) or SAP Internet Pricing and Configurator (SAP IPC)**, be it deployed on-premise or in the cloud. We even discuss products or product version that are still in development.

We are a **non-profit**, member-driven organization, with more than **500 member companies, 250+ partner companies and over 6,500 members**. CWG is one of the very few industry groups of its kind, with a unique mission to promote **knowledge exchange** in the area of SAP product configuration and **influence future SAP direction**. This community consists of experts, seasoned by long, hard project experience, newbies who want to come up to speed, managers who need to understand the business side of configuration technology, vendors who add-on to SAP's configuration technology, and many others located somewhere in-between.
